(54) PACKAGE FOR ROLL TYPE PHOTOSENSITIVE MATERIAL, ITS PRODUCTION AND HOUSING CONTAINER

(57)Abstract:

PROBLEM TO BE SOLVED: To inexpensively provide a package for a roll type photosensitive material which can be easily and accurately load in a magazine in a bright room, and its production and a housing container.

SOLUTION: As for this package; the outside diameter of a side surface light shielding member 124 is larger than that of the scroll of the roll type photosensitive material, and the part thereof whose outside diameter is larger than that of the scroll is folded by forming the fold of peak and trough going toward the almost center at plural spots, tilted along an outer peripheral surface at the outer periphery edge part of the scroll, and stuck and fixed to cover over the outer peripheral surface of the scroll. Then, the tear strength of a peripheral surface light shielding member is set to twice or more as high as that of the side surface light shielding member.
